

Product Datasheet

Vazyme - 2 × Taq Master Mi (P111-03)

Catalog Number P111-03

Description This product contains Taq DNA Polymerase, dNTP, and an optimized buffer system. It only needs to add primers and templates to perform amplification reaction, thereby reducing pipetting operations and improving detection throughput and reproducibility of results. The amplification system contains protective agents that keep 2 × Master Mix stable in activity after repeated freezing and thawing. This product is available in a version containing loading buffer, so PCR products can be directly loaded for electrophoresis after the reaction, which is convenient to use. The PCR product has an adenine at the 3' end that can be cloned into the T vector. It is also compatible with ClonExpress and TOPO cloning kits (Vazyme #C112/C113/C116/C603).

Storage Store at -30 ~ -15°C and transport at ≤0°C.

Note For research use only

Application notes Classic and reliable performance: Optimized buffer system, easy to get ideal amplification results quickly Convenient operation: Ready-to-use mix; pre-mixed formulation saves time and reduces contamination

Expiration Date 12 months from date of receipt.
