

Product Datasheet

Vazyme - One Step Mouse Genotyping Kit V2 (PD111-00)

Catalog Number	PD111-00
Category	Tools
Description	<p>One Step Mouse Genotyping Kit V2 is specially designed for the rapid genotyping of mouse. The kit includes a lysis buffer that can quickly release genomic DNA from mouse tissues (mouse tail, mouse ear, mouse toe, liver, etc.), and it is also compatible with plant leaves, blood, and 293 cell samples. The lysate can be directly used as the PCR amplification template after centrifugation. The kit is equipped with 2 × Rapid Taq Plus Master Mix (Dye Plus), which contains a new generation hot-start Taq DNA polymerase and an optimized buffer system. It only needs to add primers and templates to perform amplification, thereby reducing pipetting operations, and improving detection throughput and reproducibility of results. After repeated tests, it is widely applicable to the amplification of fragments within 8 kb. In addition, this product contains tracking dyes, enabling direct electrophoresis analysis after the reaction.</p>
Usage Notes	Restricted to UK and Ireland's customers ONLY
Storage	Store at -30 ~ -15°C and ship at ≤0°C. ▲ Mouse Direct Lysis Buffer A, and Mouse Direct Lysis Buffer B should be stored at 2 ~ 8°C for long-term storage.
Note	For research use only
Expiration Date	12 months from date of receipt.
