

Product Datasheet

Vazyme - ChamQ Universal SYBR qPCR Master Mix (Q711-00)

Catalog Number	Q711-00
Category	Tools
Description	<p>ChamQ Universal SYBR qPCR Master Mix is a special premix for qPCR reaction using SYBR Green I chimeric fluorescence method. The core component, Champagne Taq DNA Polymerase, is a novel hot-start DNA polymerase modified by antibody method. It has many advantages such as strong specificity, high detection sensitivity. With the optimal Buffer optimized for qPCR and the specific promoter, it is very suitable for qPCR reaction with high specificity and sensitivity. This kit contains special ROX, Passive Reference Dye, which is suitable for all qPCR instruments. There is no need to adjust the concentration of ROX on different instruments, and the amplification can be performed with the addition of primers and templates when preparing the reaction system.</p>
Usage Notes	Restricted to UK and Ireland's customers ONLY
Storage	<p>Store at -30 ~ -15°C and protect from light. Transport at ≤0°C. After thawing, the Master mix can be stored stably for 6 months at 2 ~ 8°C and protected from light. ▲ If white precipitate is found in the Master Mix after thawing, place it at room temperature for a short while and invert the tube upside down several times to dissolve the precipitate. Please make sure the precipitates have fully dissolved and mix thoroughly before use.</p>
Background	Only available for the UK and Republic of Ireland
Note	For research use only
Expiration Date	12 months from date of receipt.
