

Product Datasheet

Vazyme - GO-Lyo U+ One Step RT-qPCR Probe Kit (QL229-03)

Catalog Number	QL229-03
Category	Tools
Description	GO-Lyo U + One Step RT-qPCR Probe Kit is a glycerol-free one-step RT-qPCR reagent containing a lyophilization excipient for the detection of RNA templates, which can be lyophilized with a suitable lyophilization process. This product has been optimized for functional proteins, matched screening of excipients and lyophilization process, its yield rate is improved, and its storage stability reaches the same as that of glycerol-containing products, allowing for long-term stable storage after freeze-drying. In addition, it maintains the advantages of good multiplex amplification performance, high specificity and high sensitivity. We provide complete lyophilization solution that helps to reduce the time needed to optimize the lyophilization processes and ensure lyophilization formation.
Usage Notes	Restricted to UK and Ireland's customers ONLY
Storage	Store at -30 ~ -15°C and transport at ≤0°C.
Background	Only available for the UK and Republic of Ireland
Note	For research use only
Expiration Date	12 months from date of receipt.
