

Product Datasheet

Human E3 Ubiquitin-Protein Ligase NEDD4-like (NEDD4-L) ELISA Kit (orb1146830)

Catalog Number orb1146830

Category Assays and Kits

Description The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to E3 ubiquitin-protein ligase NEDD4-like(NEDD4-L). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to E3 ubiquitin-protein ligase NEDD4-like(NEDD4-L). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain E3 ubiquitin-protein ligase NEDD4-like(NEDD4-L), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of E3 ubiquitin-protein ligase NEDD4-like(NEDD4-L) in the samples is then determined by comparing the OD of the samples to the standard curve.

Reactivity Human

Concentration 20 ng/mL

UniProt ID **Q96PU5**

Application notes

standard: 20 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human NEDD4-L. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NEDD4-L. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human NEDD4-L, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Human NEDD4-L in the samples is then determined by comparing the OD of the samples to the standard curve

Assay Type

Sandwich

Assay Time

3.5h

Range

0.32-20 ng/mL

Sensitivity

0.124 ng/mL

Sample Types

serum, plasma, tissue homogenates and other biological fluids

Note

For research use only

Expiration Date

Please enquire.
