

Product Datasheet

Human Low Affinity Nerve Growth Factor Receptor (LNGFR) ELISA Kit (orb1146874)

Catalog Number	orb1146874
Category	Assays and Kits
Description	<p>The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Low Affinity Nerve Growth Factor Receptor(LNGFR). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Low Affinity Nerve Growth Factor Receptor(LNGFR). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Low Affinity Nerve Growth Factor Receptor(LNGFR), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Low Affinity Nerve Growth Factor Receptor(LNGFR) in the samples is then determined by comparing the OD of the samples to the standard curve.</p>
Reactivity	Human
Concentration	10 ng/mL
UniProt ID	P08138

Application notes

standard: 10 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human LNGFR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human LNGFR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human LNGFR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Human LNGFR in the samples is then determined by comparing the OD of the samples to the standard curve

Assay Type

Sandwich

Assay Time

3.5h

Range

0.16-10 ng/mL

Sensitivity

0.056 ng/mL

Sample Types

Serum, plasma, tissue homogenates and other biological fluids

Note

For research use only

Expiration Date

Please enquire.

Standard curve for orb1146874 ELISA kit.
