

Product Datasheet

Alpha B Crystallin Antibody (HRP) (orb147587)

Catalog Number	orb147587
Category	Antibodies
Description	<p>Mouse monoclonal to Alpha B Crystallin (HRP). The alpha-crystallins are major water-soluble lens structural proteins of the vertebrate eye that are related to the small heat shock protein family. The alpha-crystallins possess structural and functional similarities with Hsp25 and Hsp27. Mammalian lens crystallins are divided into alpha, beta and gamma families. Alpha and beta families are further divided into acidic and basic groups (Alpha-A and Alpha-B respectively). In the lens, alpha-crystallin primarily functions to maintain proper refractive index, however it can also function as a molecular chaperone that binds to the denatured proteins, keeping them in solution and thereby maintaining the translucency of the lens. When cellular stress occurs, alpha-crystallin enters its phosphorylated state and may serve a structural control function and play a role in protein maintenance. In addition to their interaction with proteins, alpha-crystallins also interact with native molecules such as membrane proteins, Golgi matrix protein, structural proteins, nuclear proteins and DNA (3, 4, 5, 6, and 7). Two other functions are an autokinase activity and participation in the intracellular architecture, and it has also been proven that both alpha-A and B prevent apoptosis by inhibiting caspases. Specifically, alpha-B crystallin is found in many cells and organs outside the lens, and alpha B is overexpressed in several neurological disorders and in cell lines under stress conditions..</p>
Target	Alpha B Crystallin
Clonality	Monoclonal
Species/Host	Mouse
Isotype	IgG1
Conjugation	HRP
Reactivity	Bovine, Human, Rat

Biorbyt Ltd.

Concentration	1 mg/ml
Buffer/Preservatives	73.64mM Carbonate, 54.55mM Ethanolamine, 45.45mM Cyanoborohydride, 18.18mM Sodium Hydroxide 0.23mM Citrate
Purification	Protein G Purified
Immunogen	Native Alpha B Crystallin
UniProt ID	P02511
MW	21kDa
Tested applications	ELISA, ICC, IF, IHC, WB
Dilution range	WB (1:2000), ICC/IF (1:100)
Application notes	0.5 µg/ml was sufficient for detection of 50 ng purified alpha B crystalline by colorimetric immunoblot analysis using Goat anti-mouse IgG:HRP as the secondary antibody.
Specificity	Detects ~20kDa (predicted mol.weight is ~21kDa). Does not cross-react with αA-crystallin, βL-crystallin, BH-crystallin, γ-crystallin, HSP25, HSP27 or HSP47 proteins.
Clone Number	3A10.C9
Storage	Conjugated antibodies should be stored according to the product label
Note	For research use only
Entrez	1410
NCBI	NP_001876.1
Expiration Date	12 months from date of receipt.
