RecombinantIL-7, His, Human (CHO-expressed) (orb1494695)

Description Interleukin-7 (IL-7), also known as lymphopoietin 1 and pre-B cell factor, is a

hematopoietic growth factor belonging to the IL-7/IL-9 family. It is produced by keratinocytes, dendritic cells, hepatocytes, neurons and epithelial cells. IL-7 binds and signals through IL-7 receptor, a heterodimer consisting of IL-7 receptor alpha and common gamma chain receptor. IL-7 plays a role in regulating early B cell and T cell development. It is also important for optimal dendritic cell-T cell

interaction.

Endotoxins < 0.2 EU/μg, determined by LAL method.

Preservatives Lyophilized after extensive dialysis against PBS.

Form/Appearance Lyophilized after extensive dialysis against PBS.

Storage Lyophilized recombinant human Interleukin-7 (IL-7), His remains stable up to 6

months at -80°C from date of receipt. Upon reconstitution, human Interleukin-7 (IL-7), His should be stable up to 1 week at 4°C or up to 2 months at -20°C.

Note For research use only

Application notes Reconstituted in ddH2O or PBS at 100 μg/ml.

Protein Sequence DCDIEGKDGKQYESVLMVSIDQLLDSMKEIGSNCLNNEFNFFKRHICDANKEGMFLFRAAR
