

Product Datasheet

Direct qPCR ProbesMaster highROX (orb1733664)

Catalog Number	orb1733664
Category	Small Molecules
Description	<p>Direct qPCR ProbesMaster highROX is designed for quantitative real-time analysis of target DNA directly from blood, swabs and animal-or plant tissue. The mix allows robust amplification avoiding the requirement of any prior DNA purification procedures. The mix is recommended for use with dual-labeled fluorescent probes, e.g. TaqMan, Molecular Beacon or Scorpion probes. It provides a powerful tool for multiplex-quantification of sample DNA in a broad dynamic range with exceptional sensitivity and precision. The mix contains all reagents required for qPCR (except template, primer and labeled fluorescent probe) in a premixed 2 x concentrated ready-to-use solution. High robustness, reliability and sensitivity of the mix are based on a an antibody-blocked hot start polymerase in combination with an optimized and well-balanced buffer system. The mix ensures fast and easy preparation with a minimum of pipetting steps and is specially recommended for: Direct detection of viral or bacterial DNA in nasal or throat swabs; Direct PCR from blood samples; Direct amplification of target DNA from various tissue samples; Point-of-Care diagnostics.</p>
Form/Appearance	liquid
Concentration	2x
Storage	store at -20 °C. avoid freeze/thaw cycles. stable at 4 °C for up to 4 weeks
Note	For research use only
Expiration Date	12 months from date of receipt.
