Crystal Hot Start Master (2x) (orb1733714)

Catalog Number	orb1733714
Description	<p>Crystal Hot Start Master is a 2 x conc. ready-to-use master mix with blocked polymerase activity at ambient temperature. The master mix is recommended for routine PCR applications, high throughput PCR or genotyping and provides an improved specificity and sensitivity when amplifying low-copy-number targets, working with complex backgrounds or when prolonged room-temperature set-ups are unavoidable. The thermal activation at the onset of the initial denaturation prevents the extension of nonspecifically annealed primers and primer-dimer formation at low temperatures during PCR setup. It contains all reagents required for PCR (except template and primer) in a well-balanced ratio to ensure high specificity and minimal by-product formation in almost all PCR applications without the need of additional optimization steps. The mix guarantees robust and reliable amplification results with a minimum of pipetting steps, saves time and reduces the risk of contaminations. The total PCR assay volume is freely adaptable to individual protocols or the requirements of automated pipetting systems.</p>
Form/Appearance	liquid
Concentration	2x conc
Storage	store at -20 °C. Short term storage (up to 3 month) at 4 °C possible
Note	For research use only
Expiration Date	12 months from date of receipt.
