

Product Datasheet

SYBR Color qPCR SuperMix (High ROX Premixed) (orb1736809)

Catalog Number	orb1736809
Category	Tools
Description	<p>1) Quickly get results, saving up to 50% of the time 2) Optimized ready-to-use master mix for rapid PCR reactions 3) Accurate detection of various starting amounts of templates, stable amplification, quantitative results with high repeatability 4) Balanced K⁺ and NH₄⁺ ion ratios, Ensure high sensitivity and high specificity. 5) Reduces pipetting errors by tracking the pipetting process through the color change reaction between dyes. . + SYBR Color qPCR SuperMix is an optimized 2 x real-time PCR master mix containing HotStarTaq DNA Polymerase, SYBR Green I fluorochrome dye, dNTP and Mg²⁺ and High ROX. In addition, the balanced K⁺ and NH₄⁺ ion ratios in the buffer promote specific primer annealing. To ensure a highly sensitive and specific PCR reaction, the reaction can be initiated by simply adding the primer and cDNA template to the ready-to-use PCR master mix. The unique PCR buffer ensures sensitive qPCR on all real- time PCR instruments without optimization. In addition, the product visualizes the spiking process through the color change reaction after the template is added, which greatly improves the spiking efficiency and avoids spiking errors</p>
Note	For research use only
Expiration Date	12 months from date of receipt.
