

Product Datasheet

Mouse Interleukin 1 Receptor Antagonist (IL-1ra/IL-1F3) Microsample ELISA Kit (orb1806575)

Description	Mouse Interleukin 1 Receptor Antagonist (IL-1ra/IL-1F3) Microsample ELISA Kit
Reactivity	Mouse
Range	31.25-2000pg/mL
Target	IL-1ra/IL-1F3
Note	For research use only
Application notes	This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse IL-1ra/IL-1F3. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody and biotinylated detection antibody specific for Mouse IL-1ra/IL-1F3. Then Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse IL-1ra/IL-1F3, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Mouse IL-1ra/IL-1F3. You can calculate the concentration of Mouse IL-1ra/IL-1F3 in the samples by comparing the OD of the samples to the standard curve.
Sample Types	Serum, Plasma and Tissue homogenate and other biological samples□Sample volume□25μL
Assay Time	3H
Sensitivity	18.75 pg/mL
Expiration Date	Please enquire.
