

## Product Datasheet

# Rat Luteinizing Hormone (LH) Microsample Fast ELISA Kit (orb1806606)

<b>Catalog Number</b>	orb1806606
<b>Category</b>	Assays and Kits
<b>Description</b>	Rat Luteinizing Hormone (LH) Microsample Fast ELISA Kit
<b>Target</b>	LH
<b>Reactivity</b>	Rat
<b>Form/Appearance</b>	Ready to use
<b>Application notes</b>	<p>This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat LH. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody and biotinylated detection antibody specific for Rat LH. Then Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat LH, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat LH. You can calculate the concentration of Rat LH in the samples by comparing the OD of the samples to the standard curve.</p>
<b>Assay Type</b>	Sandwich
<b>Assay Time</b>	3H
<b>Standard</b>	100mIU/mL
<b>Range</b>	1.57-100mIU/mL

<b>Sensitivity</b>	0.94 mIU/mL
<b>Sample Types</b>	serum, plasma, Tissue homogenate and Other biological samples □ Sample volume □ 25µL
<b>Note</b>	For research use only
<b>Expiration Date</b>	6 months from date of receipt.
