

Product Datasheet

Human Growth Hormone Receptor (GHR) Microsample Fast ELISA Kit (orb1806665)

Catalog Number	orb1806665
Category	Assays and Kits
Description	Human Growth Hormone Receptor (GHR) Microsample Fast ELISA Kit
Target	GHR
Reactivity	Human
Form/Appearance	Ready to use
UniProt ID	P10912

Application notes

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human GHR. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody and biotinylated detection antibody specific for Human GHR. Then Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human GHR, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human GHR. You can calculate the concentration of Human GHR in the samples by comparing the OD of the samples to the standard curve.

Assay Type	Sandwich
Assay Time	3H

Standard	100ng/mL
Range	1.57-100ng/mL
Sensitivity	0.94 ng/mL
Sample Types	Tissue homogenate and Cell lysate □ Sample volume □ 25μL
Note	For research use only
Expiration Date	6 months from date of receipt.
