

Product Datasheet

Human Interferon Gamma (IFN- γ) Microsample Fast ELISA Kit (orb1806760)

Catalog Number	orb1806760
Category	Assays and Kits
Description	Human Interferon Gamma (IFN- γ) Microsample Fast ELISA Kit
Target	IFN- γ
Reactivity	Human
Form/Appearance	Ready to use
UniProt ID	P01579
Application notes	<p>This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human IFN-γ. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human IFN-γ and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IFN-γ, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human IFN-γ. You can calculate the concentration of Human IFN-γ in the samples by comparing the OD of the samples to the standard curve.</p>
Assay Type	Sandwich
Assay Time	3H

Standard	1000pg/mL
Range	15.63-1000pg/mL
Sensitivity	9.38 pg/mL
Sample Types	Serum, Plasma and Tissue homogenate and other biological samples□Sample volume□25μL
Note	For research use only
Expiration Date	6 months from date of receipt.

Standard curve for orb1806760 ELISA kit.
