

Product Datasheet

Rat Angiotensinogen (AGT) ELISA Kit (orb1807090)

Catalog Number orb1807090

Category Assays and Kits

Description Rat Angiotensinogen (AGT) ELISA Kit

Target AGT

Reactivity Rat

UniProt ID **P01015**

Application notes This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat AGT. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat AGT and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat AGT, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of $450\text{ nm} \pm 2\text{ nm}$. The OD value is proportional to the concentration of Rat AGT. You can calculate the concentration of Rat AGT in the samples by comparing the OD of the samples to the standard curve.

Assay Type Sandwich

Assay Time 3.5H

Standard 4000ng/mL

Range 62.5-4000ng/mL

Biorbyt Ltd.

7 Signet Court, Swann Road
Cambridge
CB5 8LA
United Kingdom

Phone: +1 (415) 906-5211 | Fax: +1 (415) 651-8558

Sensitivity	37.50 ng/mL
Sample Types	serum, plasma, Tissue homogenate and Other biological samples
Note	For research use only
