

Product Datasheet

Human Ret Proto-Oncogene (RET) ELISA Kit (orb1807235)

Catalog Number	orb1807235
Category	Assays and Kits
Description	Human Ret Proto-Oncogene (RET) ELISA Kit
Target	RET
Reactivity	Human
UniProt ID	P07949
Application notes	<p>This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human RET. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human RET and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human RET, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human RET. You can calculate the concentration of Human RET in the samples by comparing the OD of the samples to the standard curve.</p>
Assay Type	Sandwich
Assay Time	3.5H
Standard	100pg/mL

Biorbyt Ltd.

7 Signet Court, Swann Road
Cambridge
CB5 8LA

Range	1.56-100pg/mL
Sensitivity	0.55 pg/mL
Sample Types	serum, plasma and other biological fluids; Sample volume:100µL
Note	For research use only
Expiration Date	6 months from date of receipt.
