

Product Datasheet

Mouse Resolvin E1 (RvE1) ELISA Kit (orb1817290)

Catalog Number orb1817290

Description This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Mouse RvE1 protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse RvE1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Mouse RvE1 in the samples is then determined by comparing the OD of the samples to the standard curve.

Reactivity Mouse

Range 15.63-1000 pg/mL

Concentration 1000 pg/mL

Note For research use only

Application notes standard: 1000 pg/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Mouse RvE1 protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse RvE1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Mouse RvE1 in the samples is then determined by comparing the OD of the samples to the standard curve

Sample Types serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Biorbyt Ltd.

7 Signet Court, Swann's Road,
Cambridge, CB5 8LA, United Kingdom

Assay Time	2.5h
Sensitivity	6.97 pg/mL
Expiration Date	Please enquire.
