

Product Datasheet

Mouse Alpha 1-Antitrypsin (α 1-AT) ELISA Kit (orb1949316)

Catalog Number	orb1949316
Category	Assays and Kits
Description	Mouse Alpha 1-Antitrypsin (α 1-AT) ELISA Kit
Target	α 1-AT
Reactivity	Mouse
Application notes	<p>This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse α1-AT. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse α1-AT and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse α1-AT, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Mouse α1-AT. You can calculate the concentration of Mouse α1-AT in the samples by comparing the OD of the samples to the standard curve.</p>
Assay Type	Sandwich
Assay Time	3.5H
Standard	200ng/mL
Range	3.13-200ng/mL

Biorbyt Ltd.

Sensitivity	1.88 ng/mL
Sample Types	serum, plasma, Tissue homogenate and Other biological samples
Note	For research use only
Expiration Date	6 months from date of receipt.
