

Product Datasheet

Rabbit Enterobacter aerogenes Glycerol dehydrogenase, conjugated with Biotin Antibody (orb20980)

Catalog Number	orb20980
Category	Antibodies
Description	Biotin-conjugated IgG fraction of polyclonal rabbit antiserum to glycerol dehydrogenase from Enterobacter aerogenes. This product is intended for use in precipitating and non-precipitating antibody-binding assays (such as e.g., ELISA and Western blotting and immunofluorescence or histochemical techniques).
Clonality	Polyclonal
Species/Host	Rabbit
Conjugation	Biotin
Form/Appearance	Purified hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.
UniProt ID	G0EAP7
RRID	AB_10933163
Specificity	Biotin-conjugated IgG fraction of polyclonal Rabbit antiSerum to glycerol dehydrogenase from Enterobacter aerogenes.
Antibody Type	Primary Antibody
Source	Glycerol dehydrogenase isolated and purified from Enterobacter aerogenes. Freund's complete adjuvant is used in the first step of the immunization procedure.

Storage

The lyophilised conjugate is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product.

Note

For research use only

Expiration Date

12 months from date of receipt.
