

## Product Datasheet

### Goat anti Rat IgG1 IgG2a IgG2b IgG2c IgA IgM (Fc specific) (orb21767)

<b>Description</b>	Precipitating polyclonal goat antiserum to rat immunoglobulins, IgG, IgA and IgM, Fc specific. In precipitating techniques as immunoelectrophoresis and single and double radial immuno- diffusion (Mancini, Ouchterlony) to identify and measure immunoglobulins; as secondary antibody to precipitate the immunoglobulin in normal rat serum. This antiserum is not intended for use in non-precipitating antibody-binding or other highly sensitive assays. For such uses labelled and unlabelled cytochemical and immunoassay grade reagents meeting the necessary additional specificity and performance requirements are available.
<b>Species/Host</b>	Goat
<b>Conjugation</b>	Unconjugated
<b>Preservatives</b>	Delipidated, heat inactivated, lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. No foreign protein added. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat seru
<b>Form/Appearance</b>	Delipidated, heat inactivated, lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. No foreign protein added. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat seru
<b>Storage</b>	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at - 20°C in small aliquots to prevent freeze-thaw cycles.
<b>Note</b>	For research use only
<b>Clonality</b>	Polyclonal
<b>Antibody Type</b>	Secondary Antibody
<b>Source</b>	Purified polyclonal IgG and homogenous IgA and IgM isolated from rat serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
