

Product Datasheet

Goat Rat IgE (Fc specific) Antibody (orb22189)

Catalog Number	orb22189
Category	Antibodies
Description	Precipitating polyclonal goat antiserum to Rat IgE, Fc specific. In precipitating techniques as immunoelectrophoresis and radial immunodiffusion to identify the presence of IgE in rat serum or other body fluids or to determine its concentration. To prepare an immunoadsorbent for the purification of Rat IgE from serum or plasma. This antiserum is not intended for use in non-precipitating antibody-binding or other highly sensitive assays. This does not exclude the use of the antiserum in more sensitive techniques if proper controls are included.
Clonality	Polyclonal
Species/Host	Goat
Conjugation	Unconjugated
Reactivity	Rat
Form/Appearance	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
RRID	AB_10749299
Antibody Type	Secondary Antibody
Source	Highly purified homogenous IgE isolated from rat serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
