

Product Datasheet

Rabbit anti Horse IgA (Fc specific) (orb22335)

Description	Precipitating polyclonal rabbit antiserum to dog IgA, Fc specific. In precipitating techniques as immunoelectrophoresis and radial immunodiffusion to identify the presence of IgA in dog serum or other body fluids or to determine its concentration. To prepare an immune adsorbent for the purification of dog IgA from serum or plasma.
Species/Host	Rabbit
Conjugation	Unconjugated
Preservatives	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added.
Form/Appearance	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Clonality	Polyclonal
Antibody Type	Secondary Antibody
Source	Highly purified normal IgA isolated from pooled horse serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Hazard Information	This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Biorbyt accepts no liability for any inaccuracies or omissions in this information.
Expiration Date	12 months from date of receipt.
