

## Product Datasheet

### Swine anti Goat secretory IgA (orb22454)

<b>Catalog Number</b>	orb22454
<b>Description</b>	Precipitating polyclonal swine antiserum to goat secretory IgA. In precipitating techniques as immunoelectrophoresis and radial immunodiffusion to identify the presence of IgA in goat serum, milk or other body fluids or to determine its concentration. To prepare an immunoadsorbent for the purification of goat IgA from serum or exocrine secretions. Antisera to IgA do not discriminate between serum IgA (monomeric and dimeric) and higher molecular forms as secretory IgA. This antiserum is not intended for use in non-precipitating antibody-binding or other highly sensitive assays. This does not exclude such use if proper controls are include.
<b>Species/Host</b>	Porcine
<b>Reactivity</b>	Goat
<b>Conjugation</b>	Unconjugated
<b>Preservatives</b>	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal swine serum. No foreign proteins added.
<b>Form/Appearance</b>	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal swine serum. No foreign proteins added.
<b>Storage</b>	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
<b>Note</b>	For research use only
<b>Clonality</b>	Polyclonal
<b>Antibody Type</b>	Secondary Antibody
<b>Source</b>	Highly purified secretory IgA isolated from pooled goat milk. Freund's complete adjuvant is used in the first step of the immunization procedure.
