

## Product Datasheet

### Goat Ghrelin (GHRL) ELISA Kit (orb2307974)

**Catalog Number** orb2307974

**Description** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Goat GHRL protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Goat GHRL. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of  $450\text{nm} \pm 10\text{nm}$ . The concentration of Goat GHRL in the samples is then determined by comparing the OD of the samples to the standard curve.

**Reactivity** Goat

**Range** 0.16-10 ng/mL

**Concentration** 10 ng/mL

**Note** For research use only

**Application notes** standard: 10 ng/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Goat GHRL protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Goat GHRL. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of  $450\text{nm} \pm 10\text{nm}$ . The concentration of Goat GHRL in the samples is then determined by comparing the OD of the samples to the standard curve

**Sample Types** serum, plasma, tissue homogenates, cell lysates, saliva, cell culture supernates and other biological fluids

**Assay Time** 2.5h
