# Recombinant PD-L1 Antibody / B7-H1 / CD274 (orb2635795)

<b>Catalog Number</b>	orb2635795
<b>Category</b>	Antibodies
<b>Description</b>	PD-L1 is a checkpoint regulator in immune cells, it is expressed on immune or non-hematopoietic cells. Expression of the protein is seen during pregnancy where it has a role in suppressing the immune system. PD-L1 induces an inhibitory signal in activated T-cells and promotes T-cell apoptosis. It is overexpressed in a number of different cancers where it is believed to play a significant role in the cancer's ability to evade the immune system.
