

Product Datasheet

Human Hemopexin (HPX) ELISA Kit (orb2667267)

Catalog Number	orb2667267
Category	Assays and Kits
Description	Human Hemopexin (HPX) ELISA Kit
Reactivity	Human
UniProt ID	P02790
Application notes	<p>standard: 500 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human HPX. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human HPX. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human HPX, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human HPX in the samples is then determined by comparing the OD of the samples to the standard curve</p>
Assay Type	Sandwich
Assay Time	3.5h
Range	7.82-500 ng/mL
Sensitivity	2.9 ng/mL
Sample Types	serum, plasma and other biological fluids
Note	For research use only
