Human EXOSC7(Exosome Component 7) Microsample ELISA Kit (orb2997594)

Catalog Number orb2997594

Category Assays and Kits

Description Human EXOSC7(Exosome Component 7) Microsample ELISA Kit

UniProt ID Q15024

Application notes The test principle applied in this kit is Sandwich enzyme immunoassay. The

microtiter plate provided in this kit has been pre-coated with an antibody specific to Human EXOSC7. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human EXOSC7. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human EXOSC7, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm.

The concentration of Human EXOSC7 in the samples is then determined by

comparing the OD of the samples to the standard curve.

Assay Type Sandwich

Assay Time 3.5h

Range 0.16-10 ng/mL

Sensitivity 0.064 ng/mL

Sample Types Tissue homogenates, cell lysates and other biological fluids

Note For research use only

Expiration Date Please enquire.
