

## **Product Datasheet**

## Human BAFFR(B-Cell Activation Factor Receptor) Microsample ELISA Kit (orb2998827)

Catalog Number orb2998827

**Category** Assays and Kits

**Description** Human BAFFR(B-Cell Activation Factor Receptor) Microsample ELISA Kit

UniProt ID Q96RJ3

**Application notes** The test principle applied in this kit is Sandwich enzyme immunoassay. The

microtiter plate provided in this kit has been pre-coated with an antibody specific to Human BAFFR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human BAFFR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human BAFFR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Human BAFFR in the samples is then determined by comparing

the OD of the samples to the standard curve.

Assay Type Sandwich

Assay Time 3.5h

**Range** 0.16-10 ng/mL

**Sensitivity** 0.06 ng/mL

**Sample Types** tissue homogenates, cell lysates and other biological fluids

**Note** For research use only

**Expiration Date** Please enquire.
