

Product Datasheet

ZP3022 (orb3027389)

Catalog Number	orb3027389
Category	Small Molecules
Description	<p>ZP3022 is a dual agonist targeting the glucagon-like peptide 1 receptor (GLP-1R) and cholecystokinin 2 (CCK2) receptor. It selectively enhances cAMP accumulation or ERK phosphorylation in HEK293 cells with GLP-1R or CCK2 receptor expression, compared to ERK phosphorylation in cells with the CCK1 receptor (EC50s: 0.02, 10.3, and >1,000 nM for human receptors, respectively). At 40 nM, ZP3022 promotes proliferation of rat neonatal β-cells in vitro. It also boosts glucose-induced insulin secretion (GSIS) in rat pancreatic islets at 10 and 100 nM concentrations and decreases body weight in rats at 40 nmol/kg doses twice daily. Administered at 100 nmol/kg daily, ZP3022 enhances β-cell and total pancreatic mass and improves glucose tolerance in db/db mice, while reducing food intake but not body weight in these mice.</p>
Target	Others
CAS Number	1345835-12-2
Storage	-20°C
Note	For research use only
Expiration Date	12 months from date of receipt.
