For research use only Note

**Application notes** Anti-Beta Amylase Biotin Conjugated Antibody has been tested by dot blot and

> western blot. This product is assayed against 1.0 ug of b-Amylase in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to

1:20,000 of the reconstitution concentration is suggested for this product.

Isotype lgG

**Clonality** Polyclonal

**Antibody Type** Primary Antibody

**Purity** Anti-Beta Amylase is an IgG fraction antibody purified from monospecific

antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin, anti-Rabbit Serum as well as purified and partially purified b-Amylase [Sweet Potato]. Cross reactivity against b-Amylase from other sources may occur but have not been specifically determined.
