

Product Datasheet

Recombinant Bcl-2 Antibody / Rabbit Monoclonal (orb606377)

Catalog Number	orb606377
Category	Antibodies
Description	<p>This antibody recognizes a protein of 25-26kDa, identified as the Bcl-2 alpha oncoprotein. It shows no cross-reaction with Bcl-x or Bax protein. Expression of bcl-2 alpha oncoprotein inhibits the programmed cell death (apoptosis). In most follicular lymphomas, neoplastic germinal centers express high levels of bcl-2 alpha protein, whereas the normal or hyperplastic germinal centers are negative. Consequently, this antibody is valuable when distinguishing between reactive and neoplastic follicular proliferation in lymph node biopsies. It may also be used in distinguishing between those follicular lymphomas that express bcl-2 protein and the small number in which the neoplastic cells are bcl-2 negative.</p>
Clonality	Recombinant
Species/Host	Rabbit
Isotype	Rabbit IgG, kappa
Conjugation	Unconjugated
Reactivity	Human
Buffer/Preservatives	0.2 mg/ml in 1X PBS with 0.1 mg/ml rAlbumin and 0.05% sodium azide
Purification	Protein A affinity chromatography
Immunogen	Recombinant full length human protein was used as the immunogen for this recombinant Bcl-2 antibody.
UniProt ID	P10415

Tested applications	IHC-P, WB
Dilution range	Western blot: 1-2ug/ml, Immunohistochemistry (FFPE): 1-2ug/ml for 30 min at RT
Application notes	The optimal dilution of the recombinant Bcl-2 antibody for each application should be determined by the researcher.1. The prediluted format is supplied in a dropper bottle and is optimized for use in IHC. After epitope retrieval step (if required), drip mAb solution onto the tissue section and incubate at RT for 30 min.
Antibody Type	Primary Antibody
Clone Number	BCL2/2210R
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Expiration Date	12 months from date of receipt.

IHC testing of FFPE human spleen tissue with recombinant Bcl-2 antibody (clone BCL2/2210R). HIER: boil tissue sections in 1mM EDTA buffer, pH8, for 10-20 min followed by cooling at RT for 20 min.

SDS-PAGE analysis of purified, BSA-free Bcl-2 antibody (clone BCL2/2210R) as confirmation of integrity and purity.

Western blot testing of human MCF7 cell lysate with recombinant Bcl2 antibody (clone BCL2/2210R). Expected molecular weight ~26 kDa.

IHC testing of FFPE human follicular lymphoma with recombinant Bcl-2 antibody (clone BCL2/2210R). HIER: boil tissue sections in 1mM EDTA buffer, pH8, for 10-20 min followed by cooling at RT for 20 min.

Human Protein Microarray Specificity Validation

Analysis of HuProt (TM) microarray containing more than 19,000 full-length human proteins using Bcl-2 antibody (clone BCL2/2210R). These results demonstrate the foremost specificity of the BCL2/2210R mAb. Z- and S- score: The Z-score represents the strength of a signal that an antibody (in combination with a fluorescently-tagged anti-IgG secondary Ab) produces when binding to a particular protein on the HuProt (TM) array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If the targets on the HuProt (TM) are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-scores. The S-score therefore represents the relative target specificity of an Ab to its intended target.
