PARP (N) Antibody, Rabbit Polyclonal (orb66937)

Catalog Number	orb66937
Category	Antibodies
Description	Rabbit polyclonal to PARP. Poly [ADP-ribose] polymerase 1 (PARP) is involved in the base excision repair (BER) pathway by catalyzing the poly(ADP-ribosylation) of a limited number of acceptor proteins involved in chromatin architecture and in DNA metabolism. This modification follows DNA damages and appears as an obligatory step in a detection/signaling pathway leading to the reparation of DNA strand breaks. PARP positively regulates the transcription of MTUS1 and negatively regulates the transcription of MTUS2/TIP150.
