KLRG1 (vPair™) Antibodies (orb67026)

Catalog Number	orb67026
Category	Antibodies
Description	<p>Rabbit polyclonal to KLRG1. 50 µl KLRG1 (Middle) & 50 µl KLRG1 (C-term) .vPair antibodies represent a pair of fully characterized antibodies that recognize two different regions of a target protein. The product is developed by Biorbyt to address whether the signal observed truly represents the protein of interest, an often encountered issue in antibody-based assays. The use of a pair of fully characterized vPair antibodies in the same assay can validate signal specificity since vPair antibodies recognize two independent epitopes of the same protein. Different sets of vPair antibodies are developed at Biorbyt to work with specific applications, including antibody arrays, Western blot, IP-Western, CHIP, IHC, and FACS.</p>
