

Product Datasheet

Human Kallikrein 5 (KLK5) ELISA Kit (orb775068)

Catalog Number	orb775068
Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Kallikrein 5(KLK5).
Reactivity	Human
Range	31.25-2000 pg/mL
Tested Applications	ELISA
Concentration	2000 pg/mL
Note	For research use only
Application notes	standard: 2000 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human KLK5. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human KLK5. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human KLK5, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Human KLK5 in the samples is then determined by comparing the OD of the samples to the standard curve
Sample Types	serum, plasma, saliva, tissue homogenates and other biological fluids
Assay Time	3.5h
Uniprot ID	Q9Y337
Sensitivity	12.1 pg/mL
