

Product Datasheet

Human Follicle Stimulating Hormone (FSH) ELISA Kit (orb775086)

Catalog Number	orb775086
Category	Assays and Kits
Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Follicle Stimulating Hormone(FSH).
Reactivity	Human
Concentration	50 mIU/mL
UniProt ID	P01215
Tested applications	ELISA
Application notes	standard: 50 mIU/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human FSH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human FSH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human FSH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human FSH in the samples is then determined by comparing the OD of the samples to the standard curve
Assay Type	Sandwich
Assay Time	3.5h

Range	0.79-50 mIU/mL
Sensitivity	0.34 mIU/mL
Sample Types	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Note	For research use only
Expiration Date	Please enquire.
