

Product Datasheet

Human Enkephalin (ENK) ELISA Kit (orb779104)

Catalog Number	orb779104
Category	Assays and Kits
Description	Human Enkephalin (ENK) ELISA Kit
Target	ENK
Reactivity	Human
Concentration	800 pg/mL
Tested applications	ELISA
Application notes	<p>This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human ENK. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human ENK. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human ENK in the samples is then determined by comparing the OD of the samples to the standard curve.</p>
Assay Type	Competitive
Assay Time	2h
Standard	800 pg/mL
Range	12.5-800 pg/mL
Sensitivity	3.48 pg/mL

Biorbyt Ltd.
