

Product Datasheet

Mouse Serotonin Transporter (SERT) ELISA Kit (orb780254)

Catalog Number	orb780254
Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Serotonin Transporter(SERT).
Reactivity	Mouse
Range	31.25-2000 pg/mL
Tested Applications	ELISA
Concentration	2000 pg/mL
Note	For research use only
Application notes	standard: 2000 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse SERT. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse SERT. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse SERT, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Mouse SERT in the samples is then determined by comparing the OD of the samples to the standard curve
Sample Types	tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Time	3.5h
Sensitivity	12.4 pg/mL
