

Product Datasheet

General Adenosine Diphosphate (ADP) ELISA Kit (orb782011)

Catalog Number	orb782011
Category	Assays and Kits
Description	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Adenosine Diphosphate(ADP) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Adenosine Diphosphate(ADP).
Reactivity	All
Concentration	1500 ng/mL
Tested applications	ELISA
Application notes	standard: 1500 ng/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with ADP protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to ADP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of ADP in the samples is then determined by comparing the OD of the samples to the standard curve
Assay Type	Competitive
Assay Time	2.5h
Range	23.44-1500 ng/mL
Sensitivity	7.19 ng/mL

Biorbyt Ltd.
