

Product Datasheet

Rabbit Cross Linked C-Telopeptide of Type II Collagen (CTXII) ELISA Kit (orb782236)

Catalog Number	orb782236
Category	Assays and Kits
Description	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Cross Linked C-Telopeptide Of Type II Collagen(CTXII) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cross Linked C-Telopeptide Of Type II Collagen(CTXII).
Reactivity	Rabbit
Concentration	10000 pg/mL
Tested applications	ELISA
Application notes	standard: 10000 pg/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Rabbit CTXII protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit CTXII. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Rabbit CTXII in the samples is then determined by comparing the OD of the samples to the standard curve
Assay Type	Competitive
Assay Time	2.5h
Range	156.25-10000 pg/mL
Sensitivity	51 pg/mL
