

Product Datasheet

Human PYD and CARD Domain Containing Protein (PYCARD) ELISA Kit (orb866991)

Description	Sandwich Human PYCARD ELISA Kit
Reactivity	Human
Range	15.63-1000 pg/mL
Tested Applications	ELISA
Concentration	1000 pg/mL
Note	For research use only
Application notes	standard: 1000 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PYCARD. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PYCARD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PYCARD, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Human PYCARD in the samples is then determined by comparing the OD of the samples to the standard curve
Sample Types	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Time	3.5h
Uniprot ID	Q9ULZ3
Sensitivity	7.7 pg/mL
