Product Datasheet

OnePCR HotStar
orb180497

Description
OnePCR HotStar is a ready-to-use PCR reaction mixture. Simply add primers, template, and water, the reagent will execute primer extensions and other molecular biology applications. OnePCR HotStar is a pre-mixed solution containing Hot start Taq DNA polymerase, PCR Buffer, dNTPs, gel loading dyes, and fluorescence dye.

Hazard Information
Non-Toxic

Target
OnePCR HotStar

Concentration
2X

Storage
Store at RT upto one months. Store at 4°C upto six months. Store at-20°C upto one year storage

Note
For research use only.

Expiration Date
12 months from date of receipt.

Application Notes
OnePCR HotStar is light sensitive and should be stored and protected from light.
