

## Product Datasheet

### Chicken ovomucoid protein orb381902

<b>Description</b>	Ovomucoid or trypsin inhibitor is an abundant protein in most avian egg whites. The hen's egg protein is composed of about 186 amino acid residues, and is highly glycosylated. Three tandem domains are each homologous with pancreatic trypsin inhibitor. It is highly immunogenic, and probably accounts for most cases of egg allergy.
<b>Reactivity</b>	Gallus
<b>Conjugation</b>	Unconjugated
<b>Tested Applications</b>	ELISA, SDS-PAGE, WB
<b>Target</b>	Chicken ovomucoid
<b>Form/Appearance</b>	20mM Tris, pH8.0
<b>Concentration</b>	0.87 mg/ml
<b>Storage</b>	Store at -80°C or -20°C. Avoid repeated freezing and thawing.
<b>Note</b>	For research use only.
<b>Purity</b>	> 95.0% as determined by 12% SDS-PAGE, from chicken egg white
<b>Expiration Date</b>	6 months from date of receipt.
<b>Application Notes</b>	Native protein
